

Function

A clear sheet of water in the shape of a bell. Minimal sound or splash. Ideal for small and medium-sized displays in locations which are free of wind. Suitable for groupings in varying heights.

Not water level dependent.

Specification

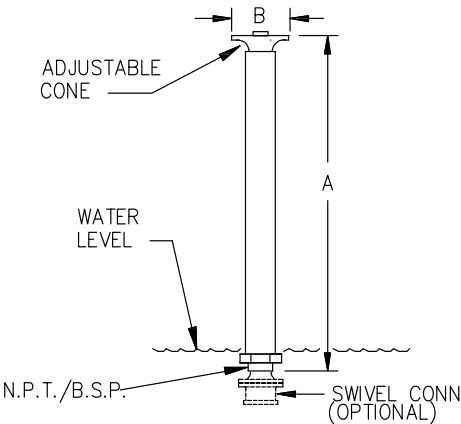

Construction shall be machined cast bronze, copper and brass with Crystals' adjustable top cone.

Options

ASU100 - 15° swivel connection for directional alignment of nozzle

Note

- For optimum effect
- 1. Requires non-turbulent water supply.
 - 2. Requires fine screening at pumps (see performance chart)
