

Function

A pulsating sphere of interconnecting discs of water, the Dandelion Sphere closely resembles a modern sculptured piece when not in use as a water feature. Ideal in enclosed malls, foyers and areas which are free of wind. Breathtaking when illuminated.

Not water level dependent.

Specification

Construction shall be cast bronze, machined brass and copper. Nozzles are easily cleaned, individually adjustable and removable.

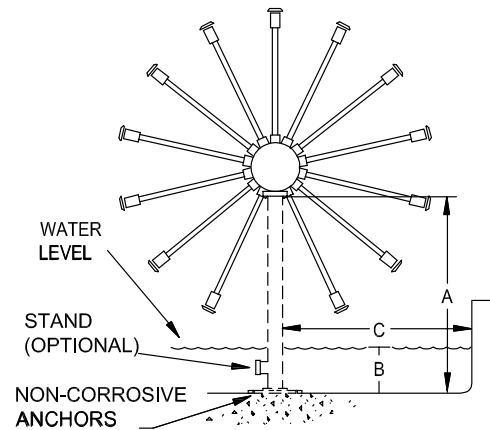

Options

Stand - Contact Crystal Fountains Inc.

Note

For optimum effect

1. Requires fine screening at pump $\frac{1}{16}$ " (.063" / 1.5mm) openings
