

Function

A majestic clear column of water which produces a misty and lacy effect. Ideal for evaporative or cooling ponds. Produces a good visual effect from a distance.
Not water level dependent.

Specification

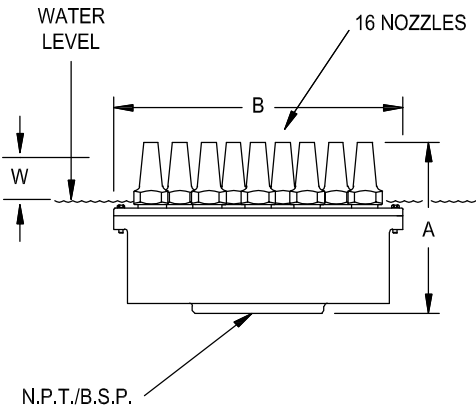

Construction shall be machined brass and cast bronze with 16 custom precision nozzles.

Options

ASU300 - 15° swivel connection for directional alignment of nozzle

Note

- For optimum effect
- 1. ECW wind control panel recommended in windy locations.
 - 2. Dimension 'W' (nozzle projection above water) must be maintained
